

Arithmetic Operators in Hindi - Python in Hindi

 hindilearn.in/tut/python/arithmetic-operators-in-hindi

Arithmetic Operators

Arithmetic Operators सात प्रकार के होते हैं |

Arithmetic Operator	Sign	Description
Addition	+	left और right operand को add करता है
Subtraction	-	left operand से right operand को subtract करता है
Multiplication	*	left और right operand को multiply करता है
Division	/	left operand से right operand को divide करता है
Modulus	%	left operand से right operand को divide करके remainder return करता है
Floor Division	//	left operand से right operand को divide करके floor value return करता है
Exponent	**	left operand का power right operand होता है

Addition Arithmetic Operator in Python

Source Code : Output :

```
11
13.5
```

Subtraction Arithmetic Operator in Python

Source Code : Output :

```
-1
-2.3000000000000007
2.3000000000000007
```

Multiplication Arithmetic Operator in Python

Source Code : Output :

```
30
44.24
44.24
```

Division Arithmetic Operator in Python

Source Code : Output :

Modulus Arithmetic Operator in Python

Source Code : Output :

```
0
4
1
1.0
```

Floor Division Arithmetic Operator in Python

Source Code : Output :

```
1.3333333333333333
1
1
0.75
0
0
```

Exponent Arithmetic Operator in Python

Source Code : Output :

```
16
16.0
1048576
1048576.0
```
